Your Blueprint For Life

Basic Level

Three Major Cycles (themes for youth, power, and wisdom)

Your life is divided into three major cycles of about 27 years each. The number of each cycle reveals the kind of influences, opportunities, and people that will be most important to you during that cycle. Your major cycles represent ongoing themes that support your progress in life.

Life Path (how you will contribute to the world)

The energy of your life path will assist you as you work to achieve growth, discover your purpose, and find fulfillment in life. This number guides you in creating your experiences in life, initiating action, and shaping your career.

Pinnacles (opportunities for accomplishment)

Your pinnacles have a major impact on your life. They represent cycles of change and development. They indicate potential peak achievements. Knowing your pinnacles helps you to discern what lies ahead, to prepare for your future, and achieve greater success.

Personal Year (what's happening right now.)

This number vibration reveals influences that you are under in the present year, helps you to understand events, and arrive at a focus for your year. When you know the number of your personal year you are better able to make sound decisions and stay in the flow.

Destiny (the meaning of your name at birth)

Your destiny indicates the vibrational patterns that your higher self has chosen for you to experience in this journey. Think in terms of potential. This is the way you can best express yourself in this lifetime, both in terms of your relationships and your career, and the way you will find your greatest satisfaction and fulfillment in living.

Current Expression (What you are attracting)

This vibration affects your career and public life. People generally use their current expression to open doors and move forward, to sign cheques, apply for jobs, and make their way in the world of business or the arts.

Persona (what others see)

This vibration shows what parts of yourself you are comfortable in sharing with others, and what others come to expect of you. It represents, to a degree, the way you prefer to see yourself, and the way you best replenish your life force.

Soul Urge (your motivation in life)

Individuals are not always aware of their soul urge, and it can create problems for them if they are living in ways that are not consistent with what their soul longs for them to experience on the Earth plane. Understanding your soul urge, and integrating it with your day to day life, will add power to your life purpose.
